

LOST BOYS
Tattoo Aftercare

- Leave your bandage on at least 4 and a maximum of 12 hour after completion of your tattoo. If the dressings become compromised and the tattoo is exposed before this time please proceed to the next step as stated below.
- Wash the entire tattoo and surrounding area with very warm water, mild/unscented soap or cleanser and a clean hand.
- Repeat until the tattoo has been rinsed of all residue.
- Pat dry with a clean paper towel.

Your new tattoo will be sore and possibly irritated for the first couple of days. It is important to keep in clean (wash twice a day) and dry (no long showers, baths or swimming) during this initial healing phase. Keep it protected from the sun, moisture, tight clothing and any potentially unsanitary conditions.

It will begin to scab, itch and peel after about 4 or 5 days. This is normal. Please do not pick or scratch at your tattoo. If your tattoo is very dry and itchy at this point you may apply a small amount non-scented, water based moisturizer once or twice a day. LESS IS MORE. This is NOT necessary for the proper healing but it might help ease any itchiness or flakey skin.

Please do not hesitate to call or email with any questions in regards to your new tattoo.

Thanks you!
